

Seattle Waterfront Advisory Team

October 13, 2004, 3-5 p.m.

Boards and Commissions Room, Room L280, Seattle City Hall
600 Fourth Avenue (Please enter on 5th Avenue)

Proposed Agenda

1. Introductions (3 p.m., 5 minutes)
2. 3 to 4 key functions desired on Central Waterfront (3:05 p.m., 40 minutes)
 - *What are the 3 to 4 key functions that should be on the Central Waterfront?*
 - *Are these functions compatible—do they reinforce each other? What conflicts do they pose?*
 - *Are there preferred locations for these?*
3. Piers and over water development (3:45 p.m., 40 minutes)
 - *Are the piers economically viable?*
 - *Should any of the pier structures be removed?*
 - *If the historical piers are to be upgraded or retrofitted, what is appropriate?*
 - *Is new over-water development appropriate? If so, where and how should it be done?*
 - *Which function, under Question #2, should the piers accommodate?*
4. Configuration of Alaskan Way surface street (4:25 p.m., 35 minutes)
 - *Should surface lanes be located more to the east or more to the west?*
 - *How should the concept plan guide development along the east side of Alaskan Way?*
 - *How do we handle need for parking on the Central Waterfront?*
 - *To what extent should parking be provided on the waterfront; what activities should have priority for parking access?*
 - *How should service access be provided for the piers, assuming they remain?*
5. Adjourn (5 p.m.)
